'RE: Single terminal airport

I favor the new One terminal idea. I travel often and see lots of airports. As long as there are adequate personnel to do the screenings it makes the process so much easier and being able to have many more options for food and entertainment. If you are having to wait for delayed flights it is almost claustrophobic to have stay in the gate area. You have to leave and re-process through security. My other problem with the current situation is Terminal B where there are times I cannot park because of Delta and Southwest being in the same terminal. In a post 9/11 world the current airport is inefficient in it's current form.

I guess a huge renovation might work but why not invest in something that will last another 40 years. The mayor and city council of the 1960's and 1970's were forward thinking and that is why the airport and the stadiums were constructed. Please be forward thinking for the next generations who would appreciate the investment of today.

Sincerely,

Jeff Sheets

KCI: Comment regarding Airport Convenience

In Under the current terminal design a person can be dropped off at their gate, not just the airport, but their actual gate. As soon as you enter the door to one side is your check in desk, to the other side is your baggage claim and you can see the plane thru the window straight ahead not more than 100 feet from the front door! KCI is the most convenient airport in the world as it is now! Why would we want to change that?

Adding more restaurants, gift shops and bars for those few flyers laying over would amount to spending over a billion dollars building an indoor shopping mall for people who don't even live here. I am not in favor of giving up our convenient 3 terminal design for that reason, or for any reason!

Single Terminal Proposal

Like most business travellers, I will not be able to attend the meeting on Monday, February 10th, because I will be travelling. I have been flown in and out of most major airports in the United States, as well as some international airports. I can say that Kansas City is the easiest and most convenient airport to fly in and out of than any other airport. The absolute worst airport I have flown in and out of is Atlanta, a single terminal airport. Don't make the mistake of building something that the people of this community neither want nor need.

KCI

I would like to ask that all members of the KCI Terminal Advisory Committee read Steve Rose's column in today's (Sunday, February 9) KC Star. And then read it again.
